Title: Engage Webinar –

### Safety in Design

Time: Thursday, 5<sup>th</sup> May 2022

10:30:00 am New Zealand

Daylight Time

### Presenter:

*Ed Bermudez – Worley*

### **Safety in Design – An engineering and design approach to Life**

*In this Webinar, Worley will provide an approach to health, safety and well-being that starts with the Engineering and Design of a project across all of its stages.*

*In the work that we do within this forum, projects have implications on the life of people throughout the asset lifecycle; whether it be the construction team that builds the facility, operators that run the facility, or the community that lives outside the boundary of the facility.*

*The engineering we do is a huge opportunity to preserve life and it is through Safety in Design (SiD) that we are able to help make a positive difference. This session will present Worley's framework for delivering an enhanced focus on SiD, some of the systems and processes used for supporting this practice along the whole project lifecycle, and practical use cases to illustrate its value.*
